JOB OPENING

SCIENTIST

DARESBUARY SCI-TECH CAMPUS, UK

As part of its continued expansion, Evove is seeking a highly capable Scientist to join our dynamic and innovative team. Based at our new state-of-the-art laboratory facilities in Daresbury, the successful applicant will be working collaboratively with team members to develop performance enhancing coating formulations for porous membrane substrates used for water treatment and separation process in a wide variety of industrial sectors around the world.

The Scientist will contribute to projects from proof of principle through to scale-up and commercialisation, with a focus on hands-on laboratory work. The successful candidate will be responsible for managing all tasks and experimental work for their allocated projects and will contribute to technical delivery against customer driven KPI's.

Key roles and responsibilities:

- Development of new functional coatings for porous substrates, especially polymer and ceramic membranes.
- Procuring sample materials from suppliers and sourcing of materials at scale.
- Evaluation of raw materials through testing and effective communication with suppliers and internal team.
- Refinement of existing coatings by building on desirable properties or development of entirely new coatings.
- Support the coatings development lead and be comfortable in conveying progress to line manager.
- Carry out filtration experiments using in house pilot units, collect data to analyse performance.
- Develop robust coating / printing processes, which are well understood and repeatable
- Maintaining compliance with regulatory and safety matters
- Maintaining laboratory consumables and chemical stock
- Display excellent communication skills for both internal and external stakeholders.

Candidate requirements:

The successful candidate will have the following skills and experience:

- BSc / MSc in chemistry, material science or a related subject
- At least 1 years industrial experience, which can be from a placement year
- Experienced within a similar role within the coatings/paints, adhesives, additives, lubricants industries working within formulation development and coating (desirable, but not essential)
- Experience in the field of membrane science (highly desirable)
- Demonstrable working knowledge of formulation, milling, coatings and additives etc.
- Confident and clear communicator at ease delivering results informally to colleagues and formally in presentations
- At ease working in groups, individually or with industrial collaborators
- Quick learner, able to adapt to a rapidly changing, innovative environment

www.evove.tech

- Ability to think critically and solve problems against time pressures
- Positive problem-solving attitude
- Working knowledge of Health and Safety
- It is expected that the successful Scientist will perform tasks outside of their job description as our company expands and evolves, so it is essential that they are collaborative with a strong desire to achieve success as part of a team.

Benefits:

- Salary of £25-£27k depending on experience
- 26 days annual leave plus bank holidays
- Company share option scheme membership
- Company pension scheme

The position is open immediately and located at the Sci-Tech campus in Daresbury in the northwest of England. It is essential that applicants have the right to work in the UK.

If you are interested, please send a CV and covering letter to hr@evove.tech outlining relevant skills and experience.

We look forward to receiving your application and getting to know you.
